## Demostración Regla de Simpson

## Grafico (1)

Reglu de simpson a demostrar:

=> teriendo ancienta que h= b-a, c= a+b, c-a=b-c=h
desarrollando lo iltimo:

$$\begin{cases} D h = b - a \\ \hline 2 \end{cases}$$

$$(2) c = a + b \\ \hline 3 c - a = h \end{cases}$$

$$\int_{a}^{b} P_{z}(x) dx = \int_{-h}^{h} P_{z}(x) dx$$

e) c es punto medio de ayb.

Por definición en la regla de simpson P(x) = Ax2 + Bx + C

$$\int_{-h}^{h} (Ax^2 + Bx + c) dx = \left(\frac{Ax^3}{3} + \frac{Bx^2}{2} + cx\right) \Big|_{-h}^{h}$$

$$= \left(\frac{Ah^{3}}{3} - \frac{A(-h)^{3}}{3}\right) + \left(\frac{Bh^{2}}{2} - \frac{B(-h)^{2}}{2}\right) + \left(ch - c(-h)\right)$$

$$= \left(\frac{4h^{3}}{3} + \frac{4h^{3}}{3}\right) + \left(\frac{8h^{2}}{2} - \frac{8h^{2}}{2}\right) + \left(\frac{2h^{3}}{3} + \frac{4h^{3}}{3}\right) + \left(\frac{8h^{2}}{2} - \frac{8h^{2}}{2}\right) + \left(\frac{2h^{3}}{3} + \frac{4h^{3}}{3}\right) + \left(\frac{8h^{2}}{2} - \frac{8h^{2}}{2}\right) + \left(\frac{2h^{3}}{3} + \frac{4h^{3}}{3}\right) + \left(\frac{8h^{2}}{3} - \frac{8h^{2}}{2}\right) + \left(\frac{2h^{3}}{3} + \frac{4h^{3}}{3}\right) + \left(\frac{8h^{2}}{3} - \frac{8h^{2}}{2}\right) + \left(\frac{2h^{3}}{3} + \frac{4h^{3}}{3}\right) + \left(\frac{8h^{2}}{3} - \frac{8h^{2}}{3}\right) + \left($$

$$= \frac{2}{3}Ah^{3} + 2Ch$$

$$= \frac{h}{3}(2Ah^{2} + 6C)$$

$$= \frac{h}{3}(2Ah^{2} + 6C)$$

Evaluemos los extremos de la función:

$$+ P(h) = Ah^{2} + Bh + c = f(a)$$
  
 $P(-h) = Ah^{2} - Bh + c = f(b)$ 

$$2Ah^{2}+2C = f(a)+f(b)$$
  
  $2(Ah^{2}+C) = f(a)+f(b)$ 

$$4h^2 + c = \frac{1}{2}(a) + \frac{1}{2}(b)$$

como C es punto medio de a y c

$$f(c) = \frac{f(a) + f(b)}{2}$$
,  $Ah^2 + c = f(c)$ 

luego

$$24h^{2} = f(a) + f(b) - 2f(c)$$

reem plazanob:

$$\frac{h}{3}(z_{A}h^{2}+6c) = \frac{h}{3}(f(a)+f(b)-2f(c)+6f(c)) = \frac{h}{3}(f(a)+4f(c)+f(b))$$

$$=\frac{h}{3}\left(+(a)+4\left(\frac{a+b}{2}\right)+4(b)\right)$$

$$-\frac{h}{3}\left(+(a)+4\left(\frac{a+b}{2}\right)+4(b)\right)$$

$$-\frac{h}{3}\left(+(a)+4\left(\frac{a+b}{2}\right)+4(b)\right)$$
